

MyLine®

MYA-2-TUT Turn Unit T type

FUNCTION

Used to automatically rotate 0°, 90° or 180° the printed circuit board on its length axis along a production line to rotate or pass-through.

TECHNICAL FEATURES

- Pneumatic rotation movement 0°-90° or translation movement (180°)
- Transport: ESD flat belt
- No1 driven section, 24V DC motors, fixed speed
- Manual width adjustment system
- Equipped with photoelectric-sensor
- Tower light display
- Direction of flow: left to right
- Interface: standard SMEMA
- Module length: 800 mm

OPTIONS

- Non-SMEMA interface
- Right-to-left flow direction
- Special ESD finishing
- Any SMEMA cable length
- Motorized width adjusting system
- Automatic width adjusting system with LCD display
- Width adjusting by handwheel
- Painted RAL 7035 panels
- 24VDC motor variable speed
- extended SMEMA
