

MYA-2-TUL Turn Unit L type

FUNCTION

Used to automatically rotate 90° the printed circuit board on its length axis along a production line.

TECHNICAL FEATURES

- Pneumatic rotation movement 0°-90°
- Transport: ESD flat belt
- No1 driven section, 24V DC motors, fixed speed
- Manual width adjustment
- Equipped with photoelectric-sensor
- Tower light display
- Direction of flow: left to right
- Interface: standard SMEMA
- Module length: 800 mm

OPTIONS

- Non-SMEMA interface
- Right-to-left flow direction
- Special ESD finishing
- Any SMEMA cable length
- Motorized width adjusting system
- Automatic width adjusting system with LCD display
- Width adjusting by handwheel
- Painted RAL 7035 panels
- 24VDC motor variable speed
