

**MyLine®**

**MYA-2-LB**  
**Lifo buffer with belts**

**FUNCTION**

Used for automatic buffering or transfer of up to 50 printed circuit boards. Uses LIFO logic.

**TECHNICAL FEATURES**

- Operative method LIFO or pass-through
- Stock capacity: 50 PCBs pitch 10mm
- Flexible pitch from 10 to 80 mm
- Transport: ESD flat belt
- No1 driven section, 24V DC motors, fixed speed
- Width adjustment by hand wheel
- Tower light display
- LCD display for functions and alarms
- Direction of flow: left to right
- Interface: standard SMEMA
- Module length: 600 mm

**OPTIONS**

- Non-SMEMA interface
- Right-to-left flow direction
- Special ESD finishing
- Any SMEMA cable length
- Motorized width adjusting system
- Automatic width adjusting system with LCD display
- Painted RAL 7035 panels
- 24VDC motor variable speed
